National Science-Technological Association of Ukraine

National association of scientific, technological parks and other innovative organizations of Ukraine (further - Association) was established in the spring of 2015 as a step towards creation of civil society in Ukraine. The goal of the Association is to facilitate the implementation of structural reforms into the national economy and the formation of knowledge economy in Ukraine that will solve existing environmental and economic problems, significantly improving the living standards of the Ukrainians.

The concept of creating Association is based on the international status of its activities, the use of the systems approach, the design principles of the work organization and the widespread involvement of selforganization mechanisms of the innovation process, while maintaining the necessary and appropriate public support for their activities. The Association creation will also increase the level of professional support of all phases of the innovation process - from the intensification of new products search to the industrial organization of competitive products with new consumer qualities.

Viktor Ivchenko
Head of Association

The National Academy of Sciences of Ukraine (NAS of Ukraine) supports the activities of the National Scientific and Technological Association of Ukraine aimed at developing scientific, technological, industrial and social innovations in various fields, expanding the capabilities of the amalgamated territorial communities, creating high-tech centers and implementing them on a cluster basis with the aim of ensuring sustainable development of the country. The developments of the Association in the field of expanding innovative cooperation at the level of international associations and individual countries, such as ODER GUAM, the Visegrad Group, the EU countries and Japan deserve special attention.

Summarizing international experience in the formation and implementation of state policy in the fields of scientific and innovative activities, directing it to the implementation of a sustainable development model and preparing proposals by the Association to use such experience in Ukraine will help overcome obstacles that hinder the effective implementation of an innovative model for the development of the national economy.

Anatoly Zagorodny
President of the National Academy
of Sciences of Ukraine

National Science-Technological Association of Ukraine

The initiator of the Association creation was International Fund of Assistance to Investments (IFAI) - one of the oldest non-governmental organizations in Ukraine that actively participated in the creation of the infrastructure of Ukrainian capital markets, of the National Depository of Ukraine.

This initiative was supported by the Ministry of Education and Science of Ukraine and the National Academy of Sciences of Ukraine.

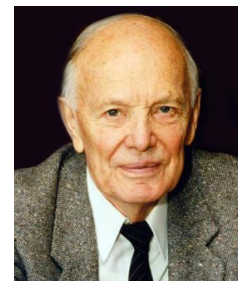

The establishment and registration of the Association was entrusted to its initiator - IFAI, together with leading Ukrainian scientific parks, namely:

- Science Park of Kyiv Taras Shevchenko University;
- Science park «Kyivska polytechnika»;
- Science Park of Odessa Polytechnic University;
- Science Park «Naukograd - Kharkiv»;
- Science Park of National University of Life and Environmental Sciences of Ukraine;
- Science park «Technology Transfer Center of Civil Protection».

The Association is established under the provisions of the Civil and Commercial Codes of Ukraine, the Law of Ukraine «On Protection of Economic Competition», the Laws of Ukraine «On Scientific parks», «On special regime for innovation activities in technological parks», the Laws of Ukraine «On Scientific park «Kyivska polytechnika», «On Higher Education», «On Industrial parks», other legal acts of Ukraine and operates in accordance with the current legislation of Ukraine and Articles of Association.

Liliia Hrynevych
Minister of education and science of Ukraine
(2016-2019)

Borys Paton
President of the National Academy of Sciences of Ukraine
(1962-2020)

National Science-Technological Association of Ukraine

Meeting of directors of scientific and technological parks «Revitalization and prospects of development of scientific and technological parks of Ukraine» Establishment of the National Association of scientific, technological parks and other innovative organizations of Ukraine.

June 25, 2015
NTUU «KPI»

General meeting of Association
November 18, 2015
Ministry of Education and Science of Ukraine

General meeting of Association
December 10, 2021
ZOOM video conference

The goal and main activities

The Association activities focus on increasing the role of scientific and technological parks in the innovative development of Ukraine, on promoting the intensification of innovative processes, on creating large-scale production of innovative products, and on transforming national economy into the «knowledge economy».

The ability of the country to produce knowledge, including scientific knowledge, its implementation and effective use for the development of the society are major factors of sustainable economic growth along with the traditional sources - investments and labor resources.

The effectiveness of the innovation environment is expected to increase significantly by providing functional completeness of institutional infrastructure, usage of modern financial instruments, information technologies and new organizational forms of innovation activities. This synergy of efforts and innovation capacity of members and institutions of innovation and investment infrastructure will allow to achieve new quality of innovation development in Ukraine.

Self-organization of the participants in the form of Association is a promising direction in the development of public- private partnership in the scientific, technological and innovative spheres.

The aim of the Association is to coordinate the activities of its members, to implement decisions focused on advocacy and protecting economic, social and other legitimate interests of its members related to their activities.

The Association coordinates the activities of its members on the following issues: cooperation with the authorities on legal regulation of common rules for the science and technological parks and other innovative structures, implementation of scientific, R&D and innovative activities, development of innovation infrastructure; establishment of communications with the government and local authorities on the formulation and implementation of state policy in the field of science, technology and innovation, the development of innovation infrastructure; participation in the established order in the consultative, advisory and other subsidiary bodies formed by state authorities; promotion of corporate interests through the establishment of mechanisms for cooperation with public authorities and local governments whose decisions affect the activity of members of the Association; protection of the interests of its members in state government, local government and other organizations both in Ukraine and abroad; dissemination of science, technical knowledge, best practices of effective technology implementation of cost reduction, environmentally friendly technologies; formation of a system of trainings for its members, regular publications of the Association and its members activities on industry issues, including international experience; organization of analytical work on management and marketing and regular dissemination of the results of this work to the members of the Association; consultations to members of the Association at the deficiencies in their activities and training to members of the Association.

Achievements of the Association

Ukraine. During its activities from 2015 to 2021, NSTAU paid priority attention to cooperation with state authorities, in particular, in order to more widely attract domestic intellectual potential to the formation and implementation of state policy, as well as to introduce the achievements of national science and technology into all spheres of the society. NSTAU supports the development of knowledge-intensive industries and services and the development of an effective social and information policy, which will stimulate the demand for relevant research and developments both in Ukraine and abroad. A number of memoranda of cooperation were signed with public associations (Association «Blockchain of Ukraine», 2018, Federation of Organic Movement of Ukraine, 2020, NGO «Agrarian Union of Ukraine», 2020), higher educational institutions (Technical University of Kosice and Uzhgorod National Universities, 2017, Kyiv National Economic University, 2017) and innovative companies (Hub 4.0, 2017, KGU Group Co LLC, 2021, Center for Aerospace Technologies LLC, 2021).

Japan. During 2015-2021 there were seven visits from Japan (one parliamentary delegation, five business delegations and one scientific delegation) to Ukraine, where NSTAU members actively participated. Furthermore, in 2015 and 2019 NSTAU authorities made working visits to Tokyo, Kyoto and Nagasaki in Japan. In March 2019, NSTAU representatives participated in an Investment Promotion Seminar that was organized in Tokyo by the Ministry of Foreign Affairs of Japan as part of the GUAM-Japan Cooperation Program. (http://www.unido.or.jp/outcome/seminars_events/6945/).

GUAM. NSTAU enforced the activities of the Organization for Democracy and Economic Development GUAM – a regional association of four states: Georgia, Ukraine, the Republic of Azerbaijan and the Republic of Moldova, based on the joint positions of countries with similar political and economic external backgrounds. During 2017-2021 NSTAU developed measures to improve the efficiency of economic cooperation between the GUAM member states, actively participated in the formation and work of GUAM expert groups on education, science and innovation. In September 2018, at the NSTAU initiative and with the participation of the National Academy of Sciences of the Republic of Azerbaijan, the Agency for Innovation and Technology of Georgia, the National Congress of Industrialists and Entrepreneurs of Moldova, 2KR PIU Project (Moldova - Japan), **GUAM Association for Innovative Development** was created. The purpose of the GUAM Association for Innovative Development is to form institutional preconditions for intensifying cooperation between GUAM member states in the scientific, technical and innovation spheres, which is a powerful reserve for the development of GUAM member states' economies.

EU (Visegrad Group). On March 20, 2017, in Slovakia, authorized representatives of NSTAU, Technical University of Kosice (TUKE) and Uzhgorod National University (UzhNU) and with the participation of university science parks signed a Memorandum of Understanding and Partnership aimed at the creation of the Ukrainian-Slovak International Center for Innovation and Transfer technologies (USICITT). This memorandum laid the foundations for the development of cooperation between scientific institutions of the two countries through the creation of the «Ukrainian-Slovak International Center for Technology Transfer» on the basis of the scientific parks of UzhNU and the Technical University of Kosice. Its activities will be aimed at organizing and coordinating scientific, technological and innovation-investment cooperation between scientific and educational institutions of national and regional institutions, mutual technology transfer, innovative development of small and medium-sized enterprises in Ukraine, Slovakia and other countries of the European Union.

National Science-Technological Association of Ukraine

Governing bodies of the Association

Management and control bodies of the Association are:

- General meeting of the Association;
- Council of the Association;
- Head of the Association;
- Board of Directors of the Association;
- Audit Committee of the Association.

The meeting of the Association, held on December 10, 2021, approved the composition of the Council, the Audit Committee and Scientific and Technical Council of the Association. The Council includes 20 well-known Ukrainian politicians, scientists and public people, the Audit Commission of the Association is headed by the Hero of Ukraine Valentyn Symonenko, who, in particular, created the Accounting Chamber of Ukraine and headed it for 15 years.

Despite the fact that most members of the Association are not state structures, through their founders they are directly connected with state universities, institutes of the National Academy of Sciences of Ukraine, ministries and departments.

Thus, the Association can ensure the implementation of state policy priorities in the innovation sphere more effectively than state bodies and institutions, due to flexibility, mobility and greater freedom of action, adequately responding to changes in the environment and current trends in innovative development in the world.

As this structure develops and strengthens as a professional community and a self-regulatory organization, certain regulatory and managerial functions of state bodies in the field of innovation can be delegated to it, which corresponds to the paradigm of reforming the public administration system in Ukraine.

National Science-Technological Association of Ukraine

Council of the Association

Volodymyr Bugrov

Rector of Taras Shevchenko National University of Kyiv. Ukrainian philosopher, teacher. Member of the National Support Group for the Bologna Process. Co-author of the Strategic Development Plan for Taras Shevchenko National University of Kyiv. Member of working groups for the development of more than ten normative acts in the field of higher education. Board member of the Ivan Franko International Foundation.
